MAGNOLIA GRANDIFLORA, ST. MARY

CAMELLIA SASANQUA, NARUMI-GATA

# Our Diamond Jubilee

This is our 75th Anniversary! For three-quarters of a century we have been doing business at Glen Saint Mary—a business that began in 1882 in a log cabin on twenty acres of land back in the pine-woods, just west of the town, then only a flag stop on the railroad.

Mr. Taber spent the early years, after moving to Glen Saint Mary, experimenting with fruit trees as a hobby, while recovering from the illness for which he had been sent South. Originally known as Taber's Nursery, the name was soon changed to Glen Saint Mary Nurseries, and finally in 1907 the then flourishing Company was incorporated under its present name.

In the catalog of 1888-89, the Satsuma Orange was listed for the first time and so began a period of phenomenal demand for this once-called Oonshiu "Kid Glove" variety from Japan.

In his fifth catalog (1889-90), Mr. Taber included an "Ornamentals" section and, from that year to now, the growing of adapted shrubs, trees and plants for the South has taken more of our time and represented an increasing per cent of our total production.

After this, Glen Saint Mary Nurseries Company followed with introductions such as Taber, Waldo and Jewel Peach; Excelsior Plum; Lue Gim Gong Orange; Hood Pear; Taber 23 and Gailey Persimmon; Hicks Mulberry; Rhoda Pomegranate. In the ornamental line: Taber, Hume, Howard, East Palatka Hollies; the Saint Mary strain of Magnolia grandiflora; and most recently the George Lindley Taber Azalea; Weaver Dogwood; Mildred Camellia.

In 1908, to further serve the needs of our patrons, a branch nursery, devoted entirely to Citrus, was established at Winter Haven, Florida. Since then, this Nursery has rapidly expanded until it occupies a foremost position among citrus nurseries of the world. Our total acreage (including Winter Haven) is now approximately 2,400 acres, with 20,000 square feet under glass.

In view of the foregoing, we of the present organizations take pride in our past performance and record. At the same time, we are making every effort within the scope of our capacity to keep abreast, or a little ahead, of the times in the contemporary horticultural world. To you, our customers of past and present, we extend our warmest thanks for your part in our 75 years, and we venture to hope that in this same spirit of mutual trust and helpfulness that has motivated our Company from its inception, we may continue to progress.

George L. Taber, Jr., *President*

*Mrs. George L. Taber*  
*1875-1957*

Mrs. George L. Taber, Vice-President of the Glen Saint Mary Nurseries Company from 1930, died June 29, 1957, at her home at the Nurseries, where she had lived since 1905. During these years she became well versed in all the varied details of the Nurseries. She had high ideals of integrity and an unfaltering attitude toward the correct naming of the many plants propagated and grown.

Mrs. Taber was admired by staff and working force alike and was held in high esteem by all fortunate enough to know her.

CAMELLIA MATHOTIANA RUBRA

## CAMELLIAS

## Class A

**ADOLPHE AUDUSSON VARIEGATED.** Variegated form of Adolphe Audusson. Dark red spotted white. A, B, C.

**C. M. HOVEY (Wm. S. Hastie; Col. Firey).** A truly magnificent flower of deepest red, large, formal double. Medium slender, upright growth. Late. A, B, C, E.

**FRED SANDER (Fimbriata Superba).** Crimson with curled, fringed petals. Quite unusual and very desirable. B, C.

**GIGANTEA (Kellingtonia; Emperor Wilhelm; Gaiety).** Red, marbled white. Very large, semi-double; rose form double, loose, open to peony form. Midseason. A, B, C, D, E, G, H.

**IL TRAMONTO.** Very large, formal double, rose-pink, mottled and striped white. Midseason. A, B.

**LADY CLARE (Empress; Nellie Bly).** Deep pink. Very large, semi-double. Vigorous, bushy growth. Early to mid-season. A, B, C, D.

**LADY MILDRED.** Crimson-red with darker veins. Large, semi-double with thick, round, creped petals and pink filaments. A, B, C.

**MATHOTIANA (Mathotiana Rubra; Purple Dawn; Julia Drayton).** An enormous rose form to formal double. Deep rose-red petals that take on a violet tint as the flower matures. Vigorous, compact, upright growth. Midseason to late. One of the finest of the red Camellias. A, B, C, D, E, F, G.

**MATHOTIANA ROSEA (Pink Beauty; Laura Polka).** Large, clear pink. A sport of Mathotiana Alba. A, B, C, D.

AZALEAS

Red

**Southern Charm.** A sport of Formosa in clear rose-red. The flowers are large and blooming time is about the same as its parent; midseason. Strong grower with good dark green foliage.

Orange

**President Clay.** Early. Tall, open growth; free flowering. Medium-sized blooms.

Variegated

**George Lindley Taber.** Our own origination, named for our founder. Soft lavender-pink, faintly streaked darker pink and mottled cerise. Slightly fragrant. A rapid grower, resistant to cold. Usually blooms here in March.

Lavender

**Formosa.** Midseason. Very large flowers of lavender-lilac. Hardy, easy to grow.

## SHRUBS AND HEDGE PLANTS

### ABELIA, EDWARD GOUCHER (Pink Abelia)

One of the most useful shrubs, for it can be confined to any desired size and can grow in almost any location. The shiny, deep green leaves are tinted with an amber hue. The dainty, clear pink flowers are produced all summer. Evergreen in warmer areas.

	10
Gal. cans, 12 to 18 in. ....	\$8 50

### ABELIA GRANDIFLORA

One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright glossy green, turning to a beautiful bronze in winter. Its flowers come in early May and the plant is covered with bloom until late autumn.

Bushy trimmed.

**CAMELLIA SINENSIS** (Tea Plant). See page 19.

**CARISSA GRANDIFLORA** (Natal Plum)

Tall-growing evergreen shrub with fragrant white flowers about 2 inches across. The scarlet fruit is edible.

10

Qt. cans .....\$4 50

**CASSIA BICAPSULARIS**

Showy legume bearing bright yellow bloom profusely in late summer and fall. Grows to 10 feet; evergreen in temperate climates.

10

Gal. cans, 18 to 24 in.....\$6 50

**CESTRUM NOCTURNUM** (Night-blooming Jessamine)

A shrub 6 to 9 feet high, adapted to south Florida. The branches are curved and willowy, producing creamy yellow blooms that are fragrant at night.

10

Gal. cans .....\$7 50

**CLEYERA JAPONICA**

A fine evergreen shrub with rather thick, glossy leaves and creamy white, fragrant flowers. Berries red in early fall. An upright grower, reaching a height of 10 to 12 feet. Will withstand wet or dry situations with equal ease and seems to have few insect or disease enemies. We recommend it highly for trial as far north as Atlanta inland or Wilmington, North Carolina, on the coast.

Gal. cans.....	7 50

**HIBISCUS MUTABILIS (Cotton-Rose; Confederate Rose)**

Tree-like tall shrub; flowers opening white or pink, changing to deep red by night. Especially prized in southern gardens.

10-in. cans.....	10	\$20 00
------------------	----	---------

**HYDRANGEA HORTENSIS**

Ornamental deciduous shrubs adapted to shady and half-shady locations. The white varieties bloom true to color; the others may be pink or blue, depending upon soil and culture. Pink blooms may usually be turned blue by the use of extra acid in the soil and blue varieties changed to pink by sweetening the soil with lime. Valuable as pot-plants indoors or used outside as flowering shrubs. The different varieties cover a long blooming season.

**Mixed Varieties.**

For those who are not particular about varieties, we offer some good unnamed ones at a nice saving.

**LAGERSTROEMIA INDICA (Crape-Myrtle), WATER-MELON-RED**

This vigorous, easily grown deciduous shrub or small tree is sometimes called "The Lilac of the South" or "June Rose." It bears immense bouquets of bright flowers during the greater part of summer.

**LAGERSTROEMIA INDICA, WILLIAM TOOVEY.**

This fine watermelon-red differs from the older type principally in its habit of growth, which is much more compact and low-spreading. An excellent variety for hedges and low screens, as well as for specimen use in the landscape plan

Bare-Root ..... 10

18 to 24 in. .... \$5 00

2 to 3 ft. .... 7 00

3 to 4 ft. .... 10 00

Qt. cans.....	\$3	50
Gal cans .....	6	00

**LIGUSTRUM ERECTA**

New compact and semi-upright variety, having the appearance of a Nobile-Iwata hybrid. While apparently not as hardy as Lucidum, this fine variety has much to recommend it.

**LIGUSTRUM EXCELSUM SUPERBUM**

A very showy sort with brightly variegated green and white leaves. A rapid grower, good for screens and windbreaks.

**LIGUSTRUM IWATA**

An intermediate grower with small, slightly mottled foliage. Ideal for low foundation plantings and hedges.

**LIGUSTRUM LUCIDUM (Wax-leaf Privet)**

Very bushy, with rich dark waxy leaves and panicles of white flowers followed by large bunches of black berries. For foundation plantings, hedges and specimens.

Our Ligustrums are grafted on root-knot resistant Quihoui stocks, except where otherwise noted.

Natural Growth, bushy

**LIGUSTRUM, SUWANNEE RIVER. Plant Patent No. 1402.**

We are growers of Suwannee River Ligustrum on Quihoui root. Suwannee River is a dwarf patented Privet, introduced by Wight Nurseries in fall, 1954. This variety is slow enough in growth to be planted around a modern ranch-type home, and yet grows fast enough that it can sell at a reasonable price.

Suwannee River is a hybrid, the parents being *Ligustrum lucidum* (Wax-leaf Privet) and *Ligustrum coriaceum*. The foliage is a deep lustrous green, smaller than Wax Ligustrum, and slightly twisted. The nodes are close together, so that the foliage almost completely hides the woody stems. It appears to be immune from attacks of white fly and other insects. It should be an excellent addition to the broad-leaved evergreens for the Southeast, the Southwest, and the Pacific Coast. It is also being tested in other regions to determine its hardiness.

We hope to have a good supply of Suwannee River for fall and winter sales, in 12 to 18 in. and 18 to 24 in. grades, and shall welcome your inquiries concerning this interesting introduction.

## OLEANDER

### MALPIGHIA COCCIGERA

A very attractive, low-growing, well-branched evergreen shrub, with an abundance of oval, prickly dark green foliage and clusters of small, distinctive white flowers. Both foliage and flowers are shining and look as if varnished. Well suited to border uses and for individual specimens.

Gal. cans. . . . . 10  
\$7 50

### NANDINA DOMESTICA (Heavenly Bamboo)

A shrub of moderate size and rather slow growth. Light green, feathery foliage tipped pink to copper in spring, changing to deep wine in winter. Vivid scarlet berries. Does best in part shade.

B&B . . . . . 10  
12 to 18 in. . . . . \$8 50  
18 to 24 in. . . . . 11 00  
Gal. cans, 12 to 18 in. . . . . 7 50

### OLEA FRAGRANS (Sweet or Tea Olive)

Dwarf evergreen. Bright green foliage. Small, white, sweet-scented flowers in winter and spring.

Gal. cans, 12 to 18 in. . . . . 10  
\$10 00  
Gal. cans, 18 to 24 in. . . . . 12 50  
10-in. cans, 2 to 3 ft. . . . . 20 00

### OLEANDER (Nerium)

Evergreen shrub with brilliantly colored flowers. Makes a beautiful flowering hedge. Does well near the seashore.

**PHOTINIA GLABRA****PHOTINIA GLABRA**

A very handsome, hardy, evergreen shrub which will grow to a height of approximately 15 feet. The new foliage is wine colored and most attractive. The white flowers are carried in clusters and are followed by round red fruits. Prefers a sunny location in well-drained soil.

**PHOTINIA SERRULATA**

This variety grows to a much greater height than Glabra and is a beautiful sight in summer with its dark green, serrated leaves and large clusters of white flowers. In winter it is covered with scarlet fruit.

**PYRACANTHA BELLI**

Interesting red-fruiting type. Growth spready like Formosana and foliage almost identical. Berries even larger and well distributed over the plant.

**PYRACANTHA, MILLER**

Similar to Belli. Good vigorous grower; medium-sized, red fruit. Quite hardy.

**PYRACANTHA, ROSEDALE**

One of the newer Pyracanthas (trade-mark registered). Produces long arching sprays of dainty white flowers. Foliage dark rich green. Bears masses of very dark red berries and lends itself well for espalier work as well as other uses. Disease resistant. 10

Gal. cans, 18 to 24 in.	\$10 00
2-gal. cans, 18 to 24 in.	15 00

**RAPHIOLEPIS INDICA (Indian Hawthorn)**

A spreading evergreen shrub of slow growth. Leaves round, thick and dark green. Fragrant, pinkish white flowers in flat clusters. Hardy. 10

Gal. cans, 8 to 12 in.	\$12 50
------------------------	---------

**PYRACANTHA**

**RAPHIOLEPIS JAPONICA**

A handsome, hardy evergreen shrub with leathery, bright green foliage and dense clusters of very fragrant, white flowers in spring. Fine for seashore planting. Rather slow growth.

**Tinus (Laurestinus)**

An evergreen flowering shrub from the Mediterranean region. When full grown the 10-foot bush, covered with creamy white flowers, is a February joy. For specimens or hedges.

Gal. cans, 12 to 18 in.	\$15 00
-------------------------	---------

**ROOT-PRUNING—Another "Glen Dividend"**

As extra insurance against transplanting losses, we are now well advanced in a long-range root-pruning project, covering some of the more critical items, such as Holly and Podocarpus. By the time this catalog reaches you, almost all of our Podocarpus will have been carefully root-pruned (by hand) and in shape for safe, trouble-free digging. Whole blocks of Ilex, too, including Cornuta National, Howard, Croonenberg and East Palatka, have been hand worked to insure the best possible root system for either bare root or B&B digging and living.

Gradually, we plan to extend this root-pruning program to include other plants and trees that for one reason or another might benefit from root-pruning.

## SHADE TREES

### ACER DASYCARPUM (Silver Maple)

This handsome tree may attain 150 feet. Leaves deeply lobed and silvery white beneath, to 6 inches across. Like most Maples, it is a fast grower. Deciduous.

Gal. cans. ....	6 00	50 00
5 qt. cans. ....	10 00	

### CERCIS CANADENSIS (American Redbud)

The American Redbud or Judas Tree is a small, nicely shaped, deciduous tree with rounded leaves and produces an abundance of rosy pink flowers in early spring. As the blooms appear before the foliage, a Redbud in full flower is a lovely picture.

### CERCIS CHINENSIS (Chinese Redbud)

An Asiatic Redbud with purplish pink flowers. Individual blooms, often measuring  $\frac{3}{4}$  inch in length, are borne in heavy clusters along the branches. Ultimate height is said to be around 50 feet and the rate of growth is somewhat faster than that of *Canadensis*. The foliage and general appearance of the tree is very similar to that popular and well-known type.

Bare-Root	10
2 to 3 ft. ....	\$10 00
3 to 4 ft. ....	15 00
4 to 6 ft. ....	22 50
B&B, double above prices.	

### CERCIS CANADENSIS ALBA (White Judas Tree)

One of the most unusual spring-flowering trees to be found anywhere is the white variety of Redbud (*Cercis canadensis alba*). Bloom is pea-like, pure white and is usually produced in early spring before the leaves appear.

Although in many respects the tree is similar to the usual type, Alba foliage is much lighter green upon the upper surface than that of *Canadensis*. Its broad, flat head of thornless, angular branchlets is distinctive wherever seen.

Unquestionably, Alba is rare and deserving of an important position in the American horticultural picture.

CORNUS FLORIDA, WEAVER

## ILEX OPACA

### HOLLIES

There is practically no section of the United States where some kind of Holly cannot be grown. In fact, it is easily possible to landscape a property entirely, from hedge to shade trees, with some variety of evergreen Holly. The small and medium sizes are readily transplanted and shipped bare-root during their dormant season (November through February), while the larger tree and shrub types are best handled B&B.

All our American Hollies (*Ilex opaca*) are grafted or cutting-grown from the finest selected strains of fruiting trees and are much superior to seedlings. Choose any one offered below, or order the whole collection.

**Cassine** (Dahoon). This native evergreen variety is very satisfactory in the South but is not recommended for the colder sections of the country. The tree is low and spreading in habit. Leaves are bright and glossy, without spines. It is a heavy bearer, the branches being literally covered with bright red berries.

**Croonenberg**. A greenbrier introduction. Upright, rather compact grower with fine dark green foliage of larger than average size and spiny leaves. Berries are a good red and produced when the trees are very young.

**Howard**. The most popular variety we grow. Foliage very dark and glossy, with some spines; berries red and attractive.

**Savannah**. An upright and rapid grower, this Holly attains true form sooner than most. Foliage abundant, leathery, bright. Berries good size, of fine color. Leaf petioles and branch tips are purple in new growth.

**Male**. Occasionally a Male Holly (staminate) is necessary, and we grow a limited number of them each year. Ask for special quotation on these.

**Prices—All preceding Hollies except Male.**

LIRIODENDRON TULIPIFERA (Tulip Tree)

Tall, symmetrical shade tree with straight trunk and dark green, unusual-shaped leaves. Flowers like inverted tulips, greenish yellow with orange at base.

Write for quotations.

ILEX VOMITORIA, See page 12

MAGNOLIA GRANDIFLORA

**MAGNOLIA GRANDIFLORA**

The great Bull Bay is the South's finest native evergreen tree; forest specimens often reach a height of 80 feet. The trees are roughly pyramidal in form with heavy leaves 5 to 8 inches long, glossy dark green above, and covered with soft brown felt beneath. The picture made by one of these magnificent trees in the sunlight is one any home-owner may justly be proud of. The flowers, which are produced over a period of two to three months in summer, are great waxy, creamy white saucers, 7 to 8 inches across, each bloom with a mass of yellow stamens and giving out a delightful fragrance. Its flowers are followed by large pods covered with brilliant red seeds.

Years ago we found that there was a great variation in seedlings, so we selected the most perfect types and grafted from them. In this way we have built up a strain, which we have named Saint Mary, superior to the wild trees and, we believe, to any stock in commerce anywhere. Our trees are uniform in size, shape, foliage and flowers, making them especially desirable for street planting.

Grows 40 to 50 feet. The well-known Italian variety. A tall, pyramidal, compact and rapid-growing tree. Very desirable where a formal effect is wanted.  
Prices on request.

**QUERCUS AQUATICA (Water Oak)**

A tall and fast-growing Oak, to 80 feet. Nearly evergreen in our climate. Bluish green leaves about 3 inches long.

**QUERCUS PRINUS (Michauxi) (Basket Oak)**

Often attains 100 feet. Leaves deciduous, to 7 inches long, coarsely toothed, shiny bright green above and grayish pubescent beneath. The acorns are over an inch in length. A relatively fast grower.

**QUERCUS VIRGINIANA (Live Oak)**

Famous both as landmarks of southern history and for their majestic beauty. The longest-lived and slowest-growing of the two varieties, this evergreen tree reaches 60 feet in height and spread. The shining dark green leaves are elliptic to oblong.

Grows to 50 feet. Introduced from China. Rapid grower. Very hardy and disease resistant.  
Prices on request.

**CERCIS CANADENSIS ALBA (White Judas Tree)**  
See page 20

## CONIFEROUS EVERGREENS

We cannot refrain from deploring the tendency of late years that South Temperate Zone home owners have shown to neglect the well-adapted conifers, such as Junipers, Biotas and Retinosporas, in favor of more showy, tropical-appearing, broadleaf material. While we do not want to be arbitrary about it, we do feel that there is still a definite need for at least a "backbone planting" of the conifers in most locations, except perhaps the extreme South. When hard cold comes along, as it always will periodically, it is heartening to know that the conifers can take it, even though some of the exotic flowering shrubs have been made unsightly or have been severely damaged by cold.

### BIOTA AUREA CONSPICUA (*Thuja orientalis*)

Deep yellow to golden color, often varying to green. Tall, compact and upright.

2-gal. cans, 18 to 24 in. .... 10  
\$12 50

### BIOTA PYRAMIDALIS (*Thuja orientalis*)

A compact pyramidal Arborvitæ reaching a height of about 15 feet. Bright green, and holds its color well.

BIGNONIA, venusta

VINES

BIGNONIA CHERERE (Scarlet Trumpet-Vine)

Strong-growing evergreen. Blooms yellow-orange, in clusters. Ideal for fences where a quick cover is desired. Stands sub-freezing cold.

BIGNONIA CHAMBERLAYNI

Evergreen. Bright yellow flowers in early spring.

BIGNONIA VENUSTA (Flame Vine)

Evergreen. Profusion of bright reddish orange flowers. Tender.

Qt. cans.....	10	\$3 50
Gal. cans.....	6	50

BOUGAINVILLEA, AFTERGLOW

Yellow-orange, changing to salmon and light rose. A most attractive variation.

BOUGAINVILLEA, BARBARA KARST

Vigorous new hybrid, much the same color as Crimson Lake but branches more readily and has larger flower bracts. Blooms along the entire branch. Makes a perfect bush without staking.

BOUGAINVILLEA, CRIMSON LAKE

A most strikingly beautiful variety with masses of bright crimson bloom. Somewhat tender.

BOUGAINVILLEA, PANAMA PINK

Light pink blooms; foliage is lighter green than Crimson Lake. Semi-climbing.

Gal. cans.....	10	\$7 50
----------------	----	--------

BOUGAINVILLEA, GLABRA SANDERIANA

Evergreen. Vigorous grower; large masses of purple flowers.

Gal. cans.....	10	\$6 50

Extra strong clumps.....	\$2.50	each and up

**EREMOCHLOA OPHIUROIDES** (Centipede Grass)

Centipede is one of the best lawn and pasture grasses for the South. Spreads by surface runners and is excellent for sunny lawns, both dry and moist soils. Centipede does not thrive under alkaline or excessive lime conditions and should not be fertilized at excessive rates. High fertilization causes heavy mat of grass with roots out of the soil and makes it susceptible to drought and disease. Close mowing at less than 2 inches is recommended. Will set about 1200 square feet per bushel when set 1 foot apart each way.

Bu. ....	\$1	65
10 bu. ....	14	50

**STENOTAPHRUM** (St. Augustine Bitter Blue Stem Grass)

Bitter Blue St. Augustine is one of our better lawn grasses, if not the best, for certain locations. Shaded lawns, coastal lawns, or those subject to salt sprays, moist to wet soils, and those too alkaline for Centipede, will support good Bitter Blue. Responds best to mowing at about 2 inches. Too close cutting of this grass is harmful.

A much-improved type, stronger growing, tougher, and extremely resistant to chinch-bugs. Throughout the year it seems to keep its color better than most southern grasses, will stand more dry weather, and is equally at home in sun or shade. One bushel will plant about 900 square feet of lawn if the grass is set a foot apart each way, or 450 square feet if spaced 1 foot by 6 inches.

Bu. ....	\$1	85
10 bu. ....	16	00

## FRUITS AND NUTS

We are one of the largest growers of fruit and nut trees in this part of the country because our land is particularly well suited to their requirements—sandy loam underlaid with clay and well drained.

With market prices on fresh fruits what they are, and likely to go up more, and considering the ever-growing emphasis on country living, we cannot afford to overlook the importance of home-grown fruits and nuts. Most nursery-propagated fruit trees can readily be heeled in on the sales lot when delivered, easily accessible to your customers. Or if not feasible to handle your entire season's supply at one time, we can arrange to split the order, making two or more deliveries at specified intervals. We strongly urge that you let us have your entire fruit tree order (as far as you can determine it) in early fall so as to avoid possible disappointment later.

## CITRUS

**ORANGES:** Glen Improved Naval, Hamlin, Lue Gim Gong, Parson Brown, Pineapple and Dancy Tangerine.

**GRAPEFRUIT:** Duncan, Glenred, Marsh Seedless and Thompson Pink.

**SATSUMA:** Owari, Kawano Wase and Silverhill.

### MEYER LEMON

**CITRUS FOR SOUTH AND CENTRAL FLORIDA**

Our extensive Citrus Nursery near Winter Haven, Polk County, in the heart of Florida's grove belt, specializes in Oranges, Grapefruit, Lemons, Limes and other adapted citrus trees that can be best grown on Sour Orange and Rough Lemon stocks. We suggest you write Glen Saint Mary Nurseries Company, Winter Haven, Florida, for wholesale and dealer arrangements in regard to this class of stock, suitable for Central and South Florida planting, and similar latitudes.

**THIS IS IMPORTANT**

For the past several years it has become more and more usual for dealers and nurserymen to order Citrus and other bare-root material unpruned.

We are convinced that this is not the proper way to handle nursery stock, from the grower's standpoint or the ultimate customer's. We wish to make it clear, therefore, that all orders received by us marked "do not prune" will be handled entirely at the buyer's risk, with absolutely **NO GUARANTEE** or **RECOURSE** in case of loss.

**PEACHES ON PLUM ROOT**

For a good many years we have been grafting our Peaches on Marianna Plum root because of its resistance to nematode (root-knot). Unfortunately, root-knot is apt to be a problem in Florida and the South as a whole, more or less serious in different locations and soils. Although we have long known that Peach on Plum root was not the ideal solution to the problem, nothing we have ever tried was as good. Peach on Plums is not a long-lived tree generally, although some are known to have survived a good many years in bearing condition.

Even with certain known shortcomings, Peaches on Plum root continue in considerable demand, and while we make no unprovable claims for them, we can say that without Peaches on Plum a good bit of the deep South would have gone peachless, as far as home and orchard production is concerned.

Angel, Babcock, Dorothy N., Elberta, Hall's Yellow, Jewel, Luttichau, Taber and Waldo.

**PEARS:** Baldwin, Carnes, Hood, Kieffer, Orient and Pineapple.

**PERSIMMONS:** Fuyugaki, Gailey, Hyakume, Okame, Taber #23, Tamopan and Tane-Nashi.

**PLUMS:** Abundance, Burbank, Excelsior, McRae, Red June, Satsuma, Terrell and Wild.

**GLEN AIR-DRIED PEAT**

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid.....	0.04%
Insoluble Phosphoric Acid.....	0.03%
Total Phosphoric Acid.....	0.07%
Nitrogen.....	1.05%
Equivalent to Ammonia.....	1.28%
pH Value....	4.90 (Neutral is 7)

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C., to whom we sent samples of Glen Peat, reads in part: "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant, however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

Normal moisture content of air-dried Glen Peat runs from 20 to 30%, and is therefore ideal for plant packing and most other horticultural uses. It may be stored in the open without fear of deterioration. For this reason, Glen Peat can be purchased in car or truck lots for use as needed.

**WHAT TO DO WITH IT**

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

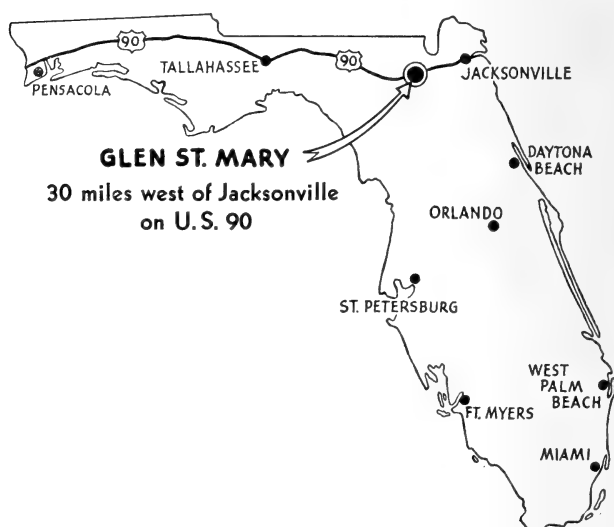

**GLEN AIR-DRIED PEAT  
PRICES**

\$3.50 per yard shredded and delivered in city limits of Jacksonville in truckload lots (approximately 20 yds. to load) for \$70.00.

Our truck charge on full loads of bulk Peat will be 40c per road mile, outside of a radius of 55 road miles from the Mine at Florahome. There is no delivery charge for the first 55 road miles, but from there on to destination will be figured at 40c per mile *one way only*.

Freight rates on Peat Humus, carload lots, minimum 60,000 pounds, from Florahome, Florida to destination, quoted on request.

**This may save you a trip: Don't take a chance, but contact us before coming or sending for a load (particularly in winter months) unless your order has previously been received and acknowledged.**

Order your fruit trees early to avoid possible delays during our rush season—November through March.

## CONDITIONS OF SALE

**PRICES:** Prices herein are for the Wholesale Trade only and cancel all previous Lists. They are based on current conditions and, therefore, subject to **CHANGE WITHOUT NOTICE**.

It is intended that orders placed at prices in this List shall consist of not less than five (5) plants of a class, as five Roses, five Oleanders, five Pecans, etc., regardless of varieties ordered to make up that five.

5 will be furnished at the 10 rate

50 will be furnished at the 100 rate

**PACKING CHARGES:** No charge will be made for packing small potted and bare-rooted stock or bulk carlot and truckload shipments. Packing will be charged (per schedule on page 38) on tubbed specimens, balled and burlapped plants, and large bare-rooted plants.

**TERMS:** Cash in full with order or satisfactory references are required of those not having established credit with us. A discount of 2% is offered **on nursery stock only for cash with order or on delivery by our trucks**. Otherwise all invoices due and payable net 30 days.

**RESERVE ORDERS:** Reserve orders are accepted upon the condition that they shall be void should injury from any cause not under our control befall the stock before shipment. Stock held in our fields on reserve long enough to grow to larger grade will be billed accordingly when stock is ordered shipped. We reserve the right, after due notice to customer, where no initial deposit is received, to cancel order or sell the stock elsewhere, if reserve order or portion thereof is held here unshipped or uncalled for beyond current shipping season or for an unreasonable length of time.

**GUARANTEE:** We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies within 30 days, it will be replaced **as soon as possible**, at not less than 50% of purchase price.

**CLAIMS:** Claims for **error or omission, or damage**, should be made in writing **immediately after receipt of nursery stock**, except for **replacement claims**, which must be made in writing **within 30 days after receipt of plants**. In case of damage in transit, immediate claim should be made to the transportation company.

**SHIPPING INSTRUCTIONS:** We ask our patrons to furnish complete shipping instructions with each order, as to both destination and mode of shipment. Otherwise, our best judgment will be used.

**DELIVERY BY OUR TRUCKS** will be at the rate of 25c per mile one way. Our three big trucks are always on hand to help with delivery problems if necessary.

**SPLIT LOADS.** It is often possible for us to deliver several orders on one load, the delivery cost being prorated on a percentage of total basis.
